2. Lying leg curl machine was used so I skipped

Exercise	Sets x Reps	Weight
Machine Lat Pulldown	4 x 15	45 kg
Straight Arm Cable Pulldown	3 x 15	14 kg

Notes:

1. Cable machine is used for wide grip Lat pulldown, so I'm using Lat pulldown machine. I do like the machine because they do the count and the time for you. I did 15 reps on average 75 seconds.

Leg Extension	3 x 12	30-40-50
Lying Leg Raise	3 x 12	
LISS	20 mins	3

Notes:

1. Cable Lateral Raise is a bit all over the place with weight because I managed to lift heavier by moving the belt up the forearm. I don't use handle. I use belt strapped to my forearms. The higher it is in the forearm, the easier the weight hence last set was 18.1 kgs.
2. I learnt from a reel by Patradecha about this Cable Rear Delt Fly. Usually it's mid to mid mimicking machine. But this one he put the cable placement high, while protracting the shoulders. I like it. Because I feel them on my rear delt.
3. My energy quite depleted after shoulders so I'm using all machine afterwards so I don't have to set things up.

Notes:

1. I added a plate of 1.25 and 2.5 after I lift 13.6 on lateral raise. So it doesn't jump straight to 18.1.
2. I will not do another upright row. My wrist isn't full healed, what other delts exercise I can do to replace that?
