Notes:

1. I am trialing new gym so some of the exercises are not available
2. After pull ups, I did Face Pull. Because Wide Grip machine is used. There's no option for T-bar row, substitute this with single-arm dumbbell row

Phase 2 Week 2 Microcycle

Exercise	Sets x Reps	weight
Rack Pull	3 x 6	85 kgs
Pull Ups	3 x 7	
Wide Grip Lat Pulldown	3 x 8, 9, 10	48 kgs

Face Pull	3 x 10	28 kgs
Ez Bar Curl	3 x 8	25 kgs
Hammer Curl (Rope)	3 x 10	12 kgs

Notes:

1. I like rack pull better than deadlift. Easier to put on the weight into the bar. And focuses more on my back than my legs.
2. I don't understand why the face pull becomes really heavy on the old gym. Last week I trial on the new gym, 27.2 kgs was quite light. I can only do 10 reps.
3. I did the hammer curl first then the EZ-bar curl since it's the same machine as face pull.
4. At 25 kgs, to lift EZ bars I have to arch my back at the very few last reps on every set.

LISS	20 mins	3

Notes:

1. Too lazy to the dance monkey so switch it to Cable Abs Crunch.
2. I use a machine for lat pulldown instead of cable because they have the counter and the time (don't know if it's wide or not but I feel it)
3. I just saw that they have T-bar supported row so I switched the ISO-high row

LISS	20 mins	3

Notes:

1. I used the machine lat pull down because it has timer and counter with 3 seconds hold at the bottom. All the machines had the timer and counter. Always assume I keep it at 3 seconds when holding (except smith machine)
2. I don't feel so inspired today for some reason. A bit sluggish. I slept at 1 am and woke up at 8 am.

Notes:

1. Left wrist is a bit sore so I have to drop the hammer curl to lower weight. Should I add a forearm training to strengthen my wrist?
